

YASH RAJESH SALI

Kolad, Maharashtra | India | +91 76200 44488 | salirajesh7@gmail.com | Portfolio: "[Yash Sali Portfolio](#)"

SUMMARY

Detail-oriented IT student at A.C. Patil College of Engineering with hands-on experience in full-stack development and machine learning. Built a 92%-accurate deepfake detection model, an IoT-based smart home system, and multiple scalable web apps. Proficient in Next.js, React.js, Node.js, MongoDB, Python, and Java, with skills in Git, deployment, and AI technologies. Certified in Google Cloud and passionate about creating efficient, user-focused solutions in real-world environments.

EDUCATION

A.C. Patil College of Engineering, University of Mumbai
Bachelor of Engineering (B.E.) in Information Technology
Kharghar, Maharashtra, India
GPA: 9.05 (Semester 6)
Expected Graduation: June 2026

D.G. Tatkare College, Kolad, Maharashtra
HSC (12th Grade) – Passed in 2022

D.G. Tatkare College, Kolad, Maharashtra
SSC (10th Grade) – Passed in 2020

ACADEMIC PROJECTS

1. CLICKK – AI Coding Assistant | Aug 2025 – Nov 2025

- Developing an AI-powered coding assistant to integrate intelligent code generation and analysis directly into the development workflow.
- Leveraged the llama3.2 large language model via Ollama to power the core features of intelligent code generation and analysis.
- Building the full-stack application using React.js for the front-end and Node.js with Express.js for the back-end to manage API calls to the AI model.

2. Deepfake Detection Model | Jan 2025 – Mar 2025

- Developed a deep learning model using Python and OpenCV to detect deepfake media content.
- Leveraged CNN architectures and pre-trained models for facial feature analysis.
- Achieved 92% accuracy using Efficient-Net architecture.

INTERNSHIPS

Full Stack Developer Intern – Enpointe Company On-site | June 2025 – Jan 2026

- Developed and maintained full-stack web applications using Next.js, React.js, Node.js, and Express.js.
- Designed and implemented RESTful APIs for seamless data communication.
- Collaborated on development, utilizing Git/GitHub for version control in an Agile environment.
- Assisted in debugging, troubleshooting, and optimizing code for enhanced performance.

Machine Learning Intern – Enpointe Company On-site | Feb 2026 – Present

- Engineered and fine-tuned custom machine learning models, including wake-word detection systems and time-series forecasting algorithms.
- Developed and deployed Retrieval-Augmented Generation (RAG) pipelines to integrate Large Language Models (LLMs) into existing web applications.
- Automated data extraction and preprocessing workflows to construct high-quality datasets for model training and validation.
- Collaborated with the full-stack team to bridge the gap between AI model research and production-level API integration.

CERTIFICATES & TRAINING

Google Cloud Study Jam Program 2023–24 – Google Developer Student Clubs Remote | Oct 2023 – Mar 2024

- Successfully completed foundational training in Google Cloud technologies.
- Gained hands-on experience in cloud infrastructure, virtual machines, storage, and deployment.
- Strengthened skills in cloud computing through collaborative learning with peers and mentors.
